SUMMARY

Software Engineer with a degree in Computer Science and Engineering, with experience in developing software systems in cloud and distributed environments. I currently work on backend services and application pipelines, following the entire development cycle, from implementation to operational management.

My main interests are programming complex systems, understanding the internal mechanisms of software, and environments where technical control and implementation quality are key.

EXPERIENCE

Software Engineer - Reply Consultant

Feb 2025 – Present

Social Thingum

Milan, IT

- Development and integration of Python pipelines for data processing in cloud environments (GCP and Azure)
- Orchestration of workflows on Google ADK, data management in BigQuery and monitoring of cloud resources
- Research and development activities on static code analysis and design of a prototype tool for automatic detection of Code Smells
- Collaboration in Agile technical teams, participating in code reviews and architectural decisions
- Coordination and mentorship of interns on software development projects, supervising implementation, code review and testing

Administrative assistant

June 2018 – July 2018

Belgian-Italian Chamber of Commerce (Erasmus+)

Bruxelles, BE

- Management and updating of files and databases using Excel.
- Sending letters and official communications to international companies and partners.

Marketing Assistant

Sep 2017 – June 2018

JA Italy Programme – Business Simulation

Milan, IT

- Visual identity design and corporate website management.

EDUCATION

Politecnico di Milano

Milan, IT

M.Sc. in Computer Science and Engineering

Sep 2023- Dec 2025

Politecnico di Milano

Milan, IT

B.Sc. in Computer Science and Engineering

Sep 2020- Sep 2023

TECHNICAL SKILLS

Programming Languages & Systems: C / C++, Python, Java; Operating systems, concurrent programming (pthread, OpenMP, MPI), functional programming

Databases & Tooling: MySQL, CosmosDB, BigQuery; db, Docker, Kubernetes, Git, CI/CD

Build, Concepts & Environment: gcc, CMake; Data structures and algorithms, static code analysis, code smells; Distributed systems, cloud

LANGUAGES

- Italian Native Speaker
- English B2 - First Cambridge and TOEIC

HOBBIES

Sport has always been an integral part of my personal development. I have consistently practiced disciplines such as volleyball, swimming, and athletics, and I also served as a certified volleyball referee. These experiences have strengthened my discipline, sense of responsibility, and ability to make sound decisions under pressure. Alongside sport, I have a strong passion for technology and tech products, driven by a deep curiosity to understand how they work and the principles behind them.
